

ATR MRO

Our Dedicated Hangar
to ATR Aircraft Servicing

Expertise

With over 20 years of experience, Fokker Services Group Asia (FSGA) is proud to be an Asia-Pacific MRO leader for ATR aircraft. In February 2012, FSGA became the first member of the ATR MRO Network, and at that time gained official recognition from the aircraft OEM as a premier heavy maintenance provider for ATR aircraft types.

Location

FSGA was established in Singapore in 1997. With EASA approval from the start, FSGA has gained experience with various types of regional aircraft such as Fokker and ATR aircrafts. With its state-of-the-art maintenance facility in Singapore, FSGA's location in the center of the Asia Pacific region is easily accessible for operators in that area. The excellent air transport connectivity and logistics infrastructure enables FSGA to quickly, efficiently and reliably bring parts in and out, ensuring on-time delivery of the aircraft from a heavy check.

Quality and Safety

FSGA's experienced workforce provide industry recognized quality results, and have the skills and expertise to guarantee no AOG or defects after aircraft return to service. FSGA not only repairs, but also enhances the asset value of operators' ATR with an improved long-term residual value.

The FSGA value proposition also includes:

- » Preferred access to ATR documentation and technical support.
- » Staff trained specifically at ATR for best-in-class OEM knowledge.
- » Six months/1,000 FH guarantee on our workmanship.
- » Certified by EASA, FAA, and more.

Turnaround Times

FSGA's talented internal capacity ensure reliable and fast delivery. More frequently, ATR checks can be about more than structures and systems, with potential component or cabin repairs needed. The close proximity of the engine MRO shop in Singapore means that experts work on the engine at the hangar. FSGA have full capabilities with a production planning in-house database (backed by over 100 ATR checks since 1997), and the large pool of B1 and B2 licensed engineers have enabled FSGA to have an excellent track record for on-time redeliveries.

One-Stop Shop for Your ATR MRO Needs

- » In-house structure component repair shop (composite repair, flight control balancing, leading edges, air intake, and more).
- » Non-destructive testing.
- » Painting (airport on-site solution).
- » In-house cabin interior refurbishment shop (repair, painting, lamination and seats).

Flexibility

With a hangar with three docks, FSGA can allow flexible check slots, short and long-term parking, deregistration and registrations services, and year-round 24/7 airport services support.

Independent Leader in Maintenance, Modifications & Conversions

Your Fleet, Our Solutions. Together

About Fokker Services Group

Fokker Services Group is an independent aerospace service company with a global reach. Providing comprehensive solutions from its five facilities in Europe, Asia and the Americas, Fokker Services Group is a key partner for regional, narrow-body and wide-body platforms in the Commercial, VIP, Cargo and Defense markets. The organization offers a unique set of capabilities, products and services: 'Modifications & Engineering Services' for the latest technical solutions; 'Component Services' such as nose-to-tail programs, exchange services, and component repairs; 'Material Services' such as parts manufacturing, spares deliveries, and tear-downs; 'Airframe Services' for aircraft MRO including lease transitions and painting; and 'Aircraft Completion & Conversion Services' for Executive, VVIP and Special Mission aircraft upgrades.
